8-Loop Rhella 1" Stainless Steel Radiant Heat Manifold w/ Flow Meter

$497.30 USD

SKU: RAM108

Rhella™ Stainless steel manifolds are suitable for distributing and controlling water in hydronic systems at low and high temperatures. The thickness of the material combined with the pressure testing of each manifold is synonymous with quality and assurance of successful operation on site. Rhella manifolds are constructed from 304 food grade stainless steel manifolds and are equipped with Swiss made Taconova flow meters, mounting brackets and 1″ threaded ends. A Canadian designed product, these manifolds carry a 5 year manufacturer warranty!
